

New fire doors installed for West Sussex charity

Site overview

Sector: Charity, Youth Services

Fireco Solution: Fire door installation

Customer requirements:

- 6 brand new internal fire doors

Based in Shoreham-by-Sea, West Sussex, ESTEEM creates spaces where everyone matters. They work with young adults, aged 14-26, to build lasting self-esteem and stronger communities through group activities and 1-2-1 support.

Heavy, outdated fire doors needed updating

“We had some very old, heavy fire doors without glass panels,” explains Joel Carter, Head of Safeguarding and Participation at ESTEEM. “The building looked very dated, and we were not meeting accessibility and safeguarding requirements without these glass panels. Many of the young adults who access ESTEEM are autistic or have sensory needs.

“We’ve had a very good experience with Fireco. They’ve provided great communication and excellent delivery of service.”

Joel Carter, Head of Safeguarding and Participation.

They found the old-style fire doors slammed shut very loudly and this was causing real challenges for them to safely engage at ESTEEM.”

6 fire doors were fitted by Fireco

“We already had a close working relationship with Fireco, since they initially contacted us to become involved as a charity partner,” continues Joel. “Their staff have volunteered their free time to help decorate our premises and have raised money for us.

From further discussions, we found out we could utilise their fire door services and fire door hardware solutions.

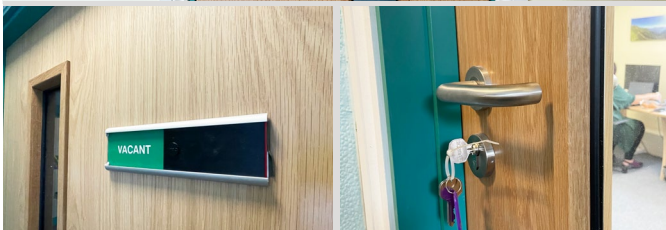

We’ve always had a great relationship and we know they are a professional and trusted company.

From further discussions, we found out we could utilise their fire door services and fire door hardware solutions.

After an inspection and consultation, the fire doors were installed and we’re very happy with the results. We really didn’t think anyone would be able to do one of the doors as it is such an unusual shape, but they fitted it no problem at all.”

After the initial installation, Fireco returned to fine-tune a door closer, addressing feedback from young adults who noticed that the doors were shutting a little loudly. The engineer was attentive to their input on-site and worked to make the adjustment effectively.

You can find out more about fire door installation by visiting www.fireco.uk or calling 01273 320650.

No matter the shape or style of your door, Fireco is committed to finding the perfect solution!
